

# What Happens Next:

## The Capstone Presentation Process

### Presentation- Why?

- Deadlines!
- Senior to Faculty (Art)
- Designers to Seniors
- Project to Reality (paperwork to Steven & Janice)
- Celebration of the work you have accomplished!!
  - You have been thinking, now it's time to show us!
- Look at what the others are doing, how it will affect your project, can you borrow/steal from them?
- Pitch: is there something you need? Ask!

### **What you need to present- expect a maximum of 15 minutes!**

- A very short synopsis
- Your concept for the show
- Design presentation: Scenic, Costume, Lighting Sound (in order)

### **After your presentation**

- Faculty may choose to ask questions. -I won't, I'm waiting for your paperwork...

## **Scenery Submission Requirements:**

- Scale ground plan (1/8", 1/4" or 1/2")
- Scaled elevation/sketches of major items
- Major props/furniture list (with examples or pieces from stock)
- How you plan to split your budget (roughly)
- Narrative of anything that isn't really obvious from the above.

## **Estimation:**

- I will take your designs, and see what we can do!
- Roughly 7 days of build for each cycle
- What each cycle will do will depend on the others in the cycle- while the build time will be "equal"- maybe some projects don't need as much time.
- Can we build your project?
- Do we have existing resources that will help your project? -Are items in your project eligible for "stock"?

Your budget:

## **\$500 combined for all departments**

- Do you have to pay overage on your royalties?
- How will you divide it? Costume/Scenery/Lights/Sound?
- Tape, brushes, screws- paid for from Shop- unless it's super crazy.

**Stock:**

- \$1000 for all 2 cycles

- Stuff that the Department can use again *as determined by the TD*

- You should expect to put part of your own budget into the purchase

**Response (1 week from presentation):**

- You will get a detailed sheet that tells you where your money is going.

- If you agree, we will encumber that amount for your shop

- If we can build out of stock/scrap, we may still charge to return to inventory.

- If your show is over-budget, we send it back for revisions

- If you need to adjust budget numbers, this is the time!

- If your drawings are not clear, we send them back for adjustment

**Drawings Package(2 week from presentation):**

- Adjusted drawings from your originals

- It's not your job to say how it is built, but give enough info to build it

- These are the drawings we will use to build your project!

- Our schedule is tight! We need you to be prepared.

- Amendments will be made on a time-allowed basis.
