Data from  
November 2021  
survey

Predictive analysis  
done by Cynthia  
Perry on 8/17/22

- The campuses predicted to have the most in-person enrollment are Central, West, and South. At 1000 unique members, Central is predicted to have >300 in person, while South and West are predicted to have >150. On Campus, Boulder and East are all predicted to have well under 100 in person attendees.
- If we look at where people are willing to travel, On-campus fairs better, but East and Boulder are still predicted to be well under 100 people with total of 1000 students enrolled.
- Of course, this assumes there are in-person classes of interest to the people who say they will attend in-person. This is a best-case scenario.
