

JOZEF (JEFF) BEMELEN, P.E.

July 1, 2016

As Director of Facilities Management and Planning for the University of Denver, Jeff Bemelen is responsible for the leadership, management, and implementation of all operating functions of the department. His responsibilities include planning, personnel management and budget oversight of the physical plant, including a \$25-million annual operating budget and a nearly \$12.8-million annual Capital Renovation/Replacement budget. Overall, the Department is responsible for building maintenance, custodial, grounds, utility management, energy conservation, sustainability coordination, construction management and real property acquisition and management.

Since coming to the University as Director in 1992, Jeff has overseen nearly \$ 700 million in New or Renovated Construction has provided oversight on \$16-plus million in energy conservation and retro-commissioning projects helping to reduce the GHG footprint on campus.

Before DU, Jeff worked as a Public Works Director for the City of Aurora, Colorado, working his way into that position from Streets & Traffic Operations Chief. Before that, he worked in the private sector as a Construction Project Manager, Field Engineer, and Land Surveyor.
