Dear Student,

Welcome to the practicum experience! You are about to begin one of the most exciting and fulfilling aspects of your degree plan. The practicum experience is an opportunity for you to apply some of the theory learned in class to the actual workplace while working under the supervision of professionals. The field mentor, faculty supervisor, faculty advisor, and practicum coordinator are all cheering for your success.

Your practicum experience can be one of the most important career enhancing choices you make. You have an opportunity to creatively build your resume and develop a professional portfolio by carefully choosing your practicum site, field mentor, and special project. Students choose practicums for a number of reasons such as:

- Experiencing the general aspects of work in an information setting
  - Example: Rotation in various departments of a public library

- Completing a special project with a unique learning experience
  - Example: Museum of Nature and Science—Digital Collection

- Understanding different types of information-providing agencies
  - Example: Denver Botanic Gardens

- Developing an area of expertise with a large project
  - Example: Summer Reading Programs

Your practicum experience can launch your career or help you develop expertise in a particular area. It can open doors to a special experience in a particular institution. It can provide an opportunity to work closely with an expert in the field. I challenge you to choose carefully and make it the best possible experience for your new career. **Your practicum experience will only be as good as you plan it.**

Clara L. Sitter, Ph.D.
Practicum Coordinator
Library and Information Science Program
University of Denver, Morgridge College of Education
The Practicum Experience

The practicum is a planned learning experience with a minimum of 100 hours of fieldwork. It is an experiential learning opportunity for students to apply the theoretical classroom lessons to a supervised work experience in a library or information agency.

It is advisable for students to spend a quarter planning the practicum. The planning includes selecting a site and field mentor, writing goals and objectives, facilitating approvals, and scheduling the work.

Practicum Definitions

- **Field Mentor**—the specialist in the library or information site who works with the student
- **Faculty Supervisor**—classroom instructor who works directly with the student and field mentor
- **Faculty Advisor**—counselor to the student throughout program; may include practicum advice
- **Practicum Coordinator**—manager of the practicum infrastructure including the site database, mentor approvals, permanent files, and handbook updates. The practicum coordinator is also the faculty supervisor.

Currently the roles of **Faculty Supervisor** and **Practicum Coordinator** are filled by the same person.

Practicum Sites. Various practicum sites are available to students depending on their areas of interest and specialization. Opportunities for experience include fields of medical, law, art, music, archives, public, school, and academic libraries. The student should select both the practicum site and a field mentor in consultation with the faculty supervisor. The practicum coordinator and/or the faculty supervisor must approve sites and field mentors.

Practicum Goals. The student determines their own specific goals and objectives with support from the field mentor and approval of the faculty supervisor. The goals of the practicum experience are to:

- Provide students with an opportunity to translate theoretical knowledge into professional practice
- Assist students in the clarification and development of professional goals
- Enable students to identify professional and interpersonal strengths and weaknesses
- Help students in the development of professional areas of interest
- Support students in the expansion of their professional networks and
- Encourage students to contribute in a positive way to the professional agencies, institutions, and organizations of the community.

Course Learning Objectives. At the conclusion of the course, students will be able to:

- Demonstrate the ability to effectively interpret and apply theory
- Identify their professional strengths and weaknesses and their area of interest
- Develop and clarify professional goals
- Contribute in a positive way to the operations of a library or information agency
- Meet the individual goals and objectives for the practicum experience

---

1Students seeking K-12 School Librarian or Teacher-Librarian licensure do 160 hours of fieldwork with 80 hours each in elementary and secondary school libraries (LIS 4911 and LIS 4912).
Students

The practicum experience is customized for each student. The student, field mentor, and faculty supervisor work together toward the achievement of the mutually agreed upon goals and objectives.

Student Eligibility. Students must complete 38-quarter hours, including the core classes, before enrolling in the practicum. Most students enroll in the practicum during the last or next to last quarter of study. All students are required to complete four credit hours of a culminating experience. This can be either a practicum (work with a practicing professional) or a capstone project (work with an LIS faculty member). Students in the School Library concentration must do the practicum to qualify for institutional recommendation for the School Librarian or Teacher Librarian endorsement.

Enrollment Guidelines. The standard class required for all LIS masters students is LIS 4910, a four-quarter hour credit class. Students in the K-12 School Library (SL) program enroll in the following two-credit courses: LIS 4911 Elementary Practicum (children, birth through age 12) and LIS 4912 Secondary Practicum (middle school, junior high or high school; ages 13-18). Students interested in work with children and teens in public libraries may also enroll in LIS 4911 and LIS 4912. The LIS 4911 and LIS 4912 require 80 hours at each level, a standard for school library programs with work in both school and public library youth programs.

Course Requirements. Students must meet requirements for four credit hours of practicum experience including class meetings, a minimum of 100 hours of on site work, and completion of all required paperwork. The work during the practicum must be unpaid. A paid internship cannot substitute for the practicum experience. [Paid internships are often available as a supplementary work experience. Students may apply for independent study credit by writing a report of the internship or project research or methodology.]

Requirements. Before beginning the fieldwork, students are required to submit an application/coversheet with goals and objectives attached. During the quarter, practicum students must submit a reflective learning journal (posted weekly), time sheet, site evaluation, final report and any additional work requested by the faculty supervisor.

Class Meetings. There will be a meeting of practicum students at the beginning and the end of each quarter and during the quarter as scheduled by the faculty supervisor. In addition, class communication via Blackboard is required.

Grades. The faculty supervisor determines the final grade with input from the field mentor. Students must earn at least a “B” grade.

Student Responsibilities. The following “Student Checklist” lists expectations of students enrolling and preparing to enroll in the practicum experience.
Student Timeline Checklist

6 to 12 months before the Practicum
- Attend the fall Showcase of Opportunities to meet representatives of libraries and information settings
- Attend a Practicum Information Session—Offered at the Showcase of Opportunities and as needed throughout the academic year
- Determine which quarter to enroll in the practicum. NOTE: Enrollment is available only during winter, spring and summer quarters.

8-16 weeks before the Practicum
- Identify 3-5 goals for the experience; write several objectives for each goal
- Discuss practicum ideas with your faculty advisor AND the practicum coordinator
- Inform the practicum coordinator of your intent to do the practicum
- Identify 3-5 goals for the experience; write several objectives for each goal

6-8 weeks before the Practicum
- Discuss options with the faculty supervisor
- Identify a practicum opportunity or use an existing site from the practicum database
- Make appointments with potential field mentors; take goals and objectives and updated resume
- Make a decision about the site soon after the pre-placement interviews
- Verify approval of the field mentor with the practicum coordinator
- Request field mentor(s) to submit a resume to the practicum coordinator (as needed)
- Register for the class(es) (K-12 SL students and/or students working with children and teens register for both LIS 4911 and LIS 4912)

3-4 weeks before the Practicum
- Polish your goals and objectives and provide an overview of the practicum work or project
- Review proposed goals and objectives with field mentor and the faculty supervisor

1-2 weeks before the Practicum
- Plan your work schedule
- Prepare paperwork for the first class (application, goals and objectives, Blackboard discussion)

During the Practicum
- Attend scheduled classes
- Report promptly to the site, complete all required hours, and maintain a time sheet of hours worked
- Complete a learning journal reflecting on activities and learning
- Submit journal entries to the faculty supervisor in a timely manner as requested
- Schedule the site visit at a time when both field mentor and faculty supervisor can attend
- Discuss the field mentor’s evaluation of your work at the end of the quarter
- Complete a written report at the end of the practicum experience addressing each objective
- Complete and submit all paperwork required by the deadline

Students can begin thinking about potential practicum sites and field mentors early in their academic work. Students are encouraged to talk with the faculty supervisor at any time before and during the practicum experience. Faculty advisors often have helpful suggestions for practicum sites and field mentors.
Principles of Ethical Conduct

While no set of guidelines can address every potential situation, the basic principles for the practicum lie in the understanding that students and faculty not only represent themselves, but also represent the University of Denver Morgridge College of Education and the Library and Information Science profession. Each person involved in the practicum experience is expected to demonstrate responsible, ethical, and professional behavior in setting goals, meeting responsibilities, and addressing problems. Principles include the following:

- **Propriety.** The practicum student should maintain high standards of personal conduct in the capacity of their identity as a student of the University of Denver.

- **Competence and Growth.** The practicum student should strive to become proficient in professional practice and performance of professional functions and activities.

- **Service.** The practicum student should regard the service obligation to the agency, institution, or organization as a primary obligation.

- **Integrity.** The practicum student should act in accordance with the highest standards of professional integrity.

- **Development of Knowledge.** The practicum student should take responsibility for identifying, developing, and fully utilizing knowledge for professional practice.

- **Scholarship and Research.** The practicum student engaged in study and research should be guided by the conventions of scholarly inquiry.

- **Confidentiality.** The practicum student should respect the privacy of information users and hold in confidence all information obtained in the course of professional service.

- **Respect, Fairness, and Courtesy.** The practicum student should treat colleagues with respect, courtesy, fairness, and good faith.

- **Commitments to the Agency or Institution.** The practicum student should adhere to the commitments made to the agency, institution, or organization.

- **Integrity of the Profession.** The practicum student should uphold and advance the values, ethics, knowledge, and mission of the profession.

- **Professional Dress.** The practicum student should dress appropriately for the standard of the library or institution where they are working—generally more formal than attending class.
Field Mentors

The field mentor is the on-site person in the agency or institution who, in cooperation with the faculty supervisor, directs the on-site practicum experience.

Selection Criteria. To be considered for appointment as a field mentor, a professional resume must be provided. The resume should describe the person’s educational background and professional work experience. It should indicate the applicant’s past and current involvement in professional activities including research, presentations, continuing education, and service in professional organizations. Field mentors must have:

- Earned an MLS, MLIS, or the equivalent
- Completed a minimum of two years in professional practice
- Expressed interest in teaching and/or mentoring students
- Agreed to participate in the instruction, guidance, and supervision of practicum students
- Scheduled time to plan appropriate learning experiences, provide continuous feedback, evaluate work performance, and schedule conferences with practicum students and faculty supervisors

Field Mentor Benefits. Serving the profession as a field mentor can be a personally rewarding experience including opportunities to:

- Sharpen professional knowledge and skills through the field mentor process
- Develop teaching skills
- Strengthen ties with the University of Denver and the Library and Information Science program
- Contribute to the development of standards through the mentor process
- Contribute to the institution by mentoring students who bring new ideas, stimulation and/or projects to the work setting

Field Mentor Responsibilities. The following general responsibilities are expected of field mentors:

- Interview the practicum student and approve the placement
- Assist the student in establishing appropriate goals and objectives
- Meet with the practicum coordinator and/or the faculty supervisor
- Coordinate and approve a work schedule for the student
- Provide the student with instruction and continuous, specific, helpful feedback on work performance (Most important! A rule of thumb is one hour for every ten hours of student work.)
- Report any problems with the student’s performance to the faculty supervisor
- Plan and implement the education experience of the student in accordance with the goals and objectives mutually agreed upon
- Manage the practicum experience within the philosophy, function, and services of the agency, institution, or organization in accordance with its policies and procedures
- Complete and sign the evaluation form and the student timesheet at the conclusion of the practicum
Faculty Supervisor

The faculty supervisor ensures a quality learning opportunity for the student and successful collaboration with the agency or institution. As a knowledgeable professional in the field, the faculty supervisor understands the importance of the practicum and is charged with helping the student and field mentor identify appropriate experiences, which enable the student to develop as a successful professional.

Faculty Supervisor Responsibilities.
- Working with students to help them plan their practicums
- Reviewing and approving each student’s practicum application, goals, and objectives
- Working with students after they register for the course
- Identifying and collecting student paperwork at the first and last classes
- Conducting an on-site visit to each practicum site once during the period
- Collecting and completing administrative documents
- Meeting with each student as needed throughout the practicum experience
- Reviewing each student’s written report addressing the ways in which the objectives were met
- Evaluating agencies in terms of their appropriate effectiveness as field learning sites
- Evaluating the performance of field mentors and students

Faculty Advisors

The role of the faculty advisor in the development of the practicum will vary from student to student. The faculty advisor can assist the student in making wise choices in designing the practicum experience.

Faculty Advisor Contributions.
- Encourage the student to begin early planning to maximize the practicum experience
- Suggest relevant sites and/or field mentors in the areas of interest
- Discuss appropriate goals and objectives to complement the student’s degree plan

Practicum Coordinator

The coordinator has the responsibility for seeing that the practicum experience runs smoothly by maintaining communication with students, field mentors, faculty supervisors, and university administrators.

Practicum Coordinator Responsibilities.
- Overseeing the upkeep of a practicum database of sites and field mentors
- Maintaining contacts with potential field mentors
- Updating the practicum handbook
- Assisting students in choosing appropriate sites and field mentors
- Making initial contacts with field mentors for approvals and orientations
- Serving as the program liaison to the faculty supervisor or serving as the faculty supervisor
- Managing completed practicum files
- Troubleshooting difficult practicum situations

2 Currently the Faculty Supervisor and the Practicum Coordinator roles are filled by the same person.
3 Telephone conference calls may substitute for site visits when sites are out of state, out of driving range, or circumstances prevent an on-site visit.
Goals and Objectives

The Practicum is an opportunity for students to design their own learning experience. The design is done with the advice of faculty advisors, the practicum coordinator, and field mentors. The first step for the student is to identify what they want out of the experience. Ideally, students will begin thinking about their practicum experience long before putting it together.

Once a general idea is conceived, then the student should write 3-5 general goals. Under each goal it is appropriate to identify several specific objectives. Consider the acronym SMART when writing objectives, i.e., Specific, Measurable, Attainable, Realistic and Time bound.

Goals and objectives are sometimes called by different names in different settings such as targets, actions, etc. For the purposes of the practicum we are using Goal as the general statement and Objective for the specific. The relationship is best understood when they are presented in outline form:

Goal #1
- Objective
- Objective
- Objective

Goal #2
- Objective
- Objective
- Objective

Goal #3
- Objective
- Objective
- Objective

It is most important to identify goals and objectives BEFORE you talk with a field mentor. The field mentor may have suggestions for ways to enhance your goals and objectives but it is critical that the student initiate the areas of focus. See the descriptions of practicums, internships, service learning, and special projects for a clear understanding of the perspective. It is a difference in perspective, and there is a fine line of distinction in many cases. The point is that “DU/the student” is initiating the focus of the practicum while in the other cases the library or information provider is initiating the project or focus of work. That is not to say that a project cannot be part of the practicum work but generally it should not be the major focus.

Only 4-5 per cent of people set goals, and yet over 90 percent of those who do set goals achieve them. Setting goals is an excellent way to raise the probability of success in implementing your projects and changes.
Goals.
Identifying the goals is the easy part. The goal statements are broad and general. Example:

Goal #1—To practice reference skills in a public library.

Objectives.
Applying the SMART elements to your objectives is more difficult for some people.

- **Specific**—Write the objective in one specific statement.
- **Measurable**—Ask yourself: How will you know you accomplished the objective? Is there a product, a statistic, a percentage?
- **Attainable**—Ask yourself: Is it possible to do this within the required parameters?
- **Realistic**—Again, Is it within reason to expect to complete the objective?
- **Time bound**—Typically, “time-bound” implies a date or a deadline e.g., six months or by December, 2014. For practicum planning, think about the number of hours you expect it will take to accomplish the objectives. Think carefully about how you are “spending” your precious 100 hours of the practicum.

Example:
Work 10 hours on the Information Desk and answer at least 20 questions with 90% accuracy.

Flexibility. Your goals and objectives are not set in stone. They are simply a planning guide. Once YOU have verbalized your wishes, talk with your faculty advisor and/or the practicum coordinator for additional input. Only then should you consider possible sites and field mentors where you think you can best achieve what you want out of the practicum. Once you are into the practicum work it is expected that you will make some adjustments in the time estimates as well as objectives as new opportunities or interests are revealed.

Both your advisor and the practicum coordinator can suggest possible sites and field mentors. It is suggested that you identify several possible sites and field mentors. Make appointments to talk with them, telling them that you are “investigating” several possible sites. Prepare as if you are doing a job interview. In each case, both parties are trying to find the best match. It is a good idea to update your resume and take it with your goals and objectives when you meet with potential field mentors.

Remember to follow up with people you have interviewed with to thank them and update them on your progress and plans for the practicum. Keep your advisor and practicum coordinator updated on your plans as well.

Once you have determined the best “fit” for your practicum, the next step is to complete the application form. The advisor’s signature is requested to confirm that you are ready to begin the practicum. To be “ready” you need to have completed at least 38 hours including your core and concentration classes. If you are missing courses your advisor and/or faculty supervisor can determine if you are prepared to begin the practicum. It is not fair to you or your field mentor to place you in an experiential situation until you have the course work to support your work.

Appendix B—Resume Tips  
(Abridged from Several Career Center Handouts)

There is no formula for a perfect resume but there are a number of considerations when preparing your resume. LIS students are encouraged to use the services and handouts from the University of Denver Career Center. The Career Center Counselors will provide help in resume critiquing, interviewing skills, and other tips for the job search. **Pat O'Keefe, DU Career Center Counselor,** is currently assigned to assist LIS students.

**General Guidelines Regarding Style**

- Put your most important information near the top and left to attract the reader’s attention.
- List dates of employment on the right or after the job title, employer name, and location of job.
- Create a resume using **key words** that describe your skills, traits, and knowledge. Some employers scan resumes into their databases and look for the keywords.
- Consider two experience sections if you have related and unrelated experience.
- Choose the resume style that best suits the position you seek. Sample resumes for chronological and functional styles are available on the DU Career Center website at www.du.edu/career.

**Chronological Style**
This is best used by people whose work experience and history (internships or jobs) is clearly relevant to their job target and by people in fields where the chronological resume is very traditional.

- An outline of relevant information listed in reverse chronological order (most recent first).
- The easiest resume preparing and often preferred by employers.

**Functional Style**
This style is best used by individuals without related paid work experience, career changers, and people entering or re-entering the job market.

- Contains a work history section but emphasizes concrete (verifiable) skills where outcomes or quantifications ($ or %) may strengthen the accomplishments listed.
- Skills that are transferred from past experience (not limited to paid work experience) to a future job. Example: What you actually can do, such as organizing, communicating, analyzing, and managing.
- Select the skills areas that most apply to the position you are seeking then briefly describe the experiences that developed the skills. It is not enough to say you have “strong analytical ability” without providing proof. Communicate what distinguishes you from other applicants with similar skills.

**Resume Sections**

**Contact Information**—Always place at the top of the page to ensure it is picked up by scanning.

**Career Objectives**—Relate everything on your resume to the job announcement to ensure interview.

**Education**—Include college degrees (may need to spell out), university, city, state, and graduation date.

**Experience**—Most recent first; job title, employer, city, state, beginning and end dates, description of job accomplishments, and outcomes.

**Accomplishments**—Examples: saving time or money, solving problems, enhancing performance, improving products or services, managing a crisis, increasing profits or services.

**References**—Do not list names, addresses and phone numbers of references. Get permission from potential references to use them as references.
**Additional Headings**—You can create additional headings to fit the skills you want to highlight. Examples: foreign languages, software skills, honors and awards, international experience, publications, presentations, certifications and licenses (especially for teaching), and professional associations.

**General Tips for an Effective Resume**

*Customize*—Revise your resume for specific jobs.

*Length*—Unless you have extensive relevant experience, limit yourself to one page.

*Specifics*—Concise, detailed, results-oriented phrases get maximum interest.

*Languages*—When possible, use the terminology or jargon of the employer.

*Quantify*—Describe your duties and accomplishments with measurable data, e.g. dollars, percents, numbers, and frequency. Be specific about your skills and competencies.

*Design*—Make the resume inviting to read with attractive headings, good balance of black and white, wide margins, and a limited selection of font sizes and styles. Do not use less than 10-point font. Use bullets and columns for easy reading.

*Highlight*—The reader’s eye goes first to the top, left side of the resume and this is where to place your most important information.

*Proofread*—Have your resume critiqued by several people, including a professional in your field. Field Mentors are usually happy to critique your resume once you are working in a practicum situation.

*Consistency*—Provide information in a consistent format within each section of your resume.

*Printing*—Use laser quality print on 24# weight laser-compatible paper is recommended. If you fax or scan your resume, always use white paper.

**Action Verb Sample List**

Use action verbs to describe your accomplishments including the following: accomplished, achieved, administered, advised, analyzed, appraised, arbitrated, arranged, assessed, assisted, audited, bought, budgeted, built, calculated, changed, chaired, collected, communicated, completed, conceptualized, conducted, consolidated, constructed, controlled, coordinated, counseled, created, critiqued, delivered, demonstrated, designed, determined, developed, devised, directed, discovered, edited, eliminated, ensured, equipped, established, evaluated, examined, expanded, financed, formulated, founded, generated, governed, graded, guided, handled, hypothesized, implemented, improved, initiated, instituted, introduced, investigated, maintained, managed, modified, monitored, negotiated, observed, obtained, organized, oversaw, participated, performed, persuaded, piloted, prepared, presented, produced, programmed, projected, promoted, publicized, purchased, qualified, questioned, raised profits, recommended, recorded, reduced, researched, reviewed, selected, solved, specified, structured, summarized, supervised, systematized, tested, trained, translated, wrote.

**Resume Checklist**

- Include a cover letter
- Write your resume yourself
- Proofread for typographical, spelling, and grammar errors
- Use quality paper and a quality laser printer
- Keep your resume focused and targeted to a specific job
- Focus on higher level and transferable skills
- Include specific examples of significant accomplishments and results
Appendix C—PROFESSIONAL PORTFOLIOS

A portfolio is a way to showcase your accomplishments and give examples of your finest work. Students entering the LIS Program fall 2013 and after will do a portfolio instead of a comprehensive exam. The portfolio site will include artifacts from each core class including practicum. Portfolios are highly recommended for all students.

Portfolio-approach Resume. You can design your resume in a portfolio approach by organizing the content by outcome categories including Skills, Accomplishments, and Projects. This may be particularly valuable for people who have transferable skills from other career experiences.

Transferable Skills. Desirable roles and traits can be emphasized through a variety of settings. A few examples include
- Communication
- Creativity
- Initiative
- Leadership
- Management
- Planning
- Research

Portfolio Artifacts. Concrete examples for your portfolio may vary depending on the position you are seeking. As students in the LIS program you can begin to put your portfolio together by saving your work from classes. Begin by using the DU Portfolio Site. Examples include:
- Annotated bibliographies
- Appreciation letters
- Book reviews
- Certificates of training
- Essays
- Fact sheets
- Handouts
- Lesson plans for instruction
- Letters of recommendation
- Pathfinders or guides
- Poster presentations
- PowerPoint presentations
- Professional memberships and service
- Programming plans
- Projects
- Publications
- Research papers
- Statement of values, philosophy, goals
- Volunteer work
- Web pages
Format. Your portfolio can be electronic or print—or both. The portfolio should be compact and easily accessible. You can include the URL for an electronic portfolio. For a print portfolio you need to organize your materials in a compact presentation. A notebook with page protectors and guides may be the easiest for portability and flexibility.

- **Electronic Portfolio.** You have a free site on the DU web for your own portfolio. Students can begin the organization and development of their portfolio sites during their first quarter on campus. Items can be added as they are completed by class assignments. It is not necessary to include everything you ever created; you can be selective as your work improves. The DU portfolio site allows options for degrees of access: personal access only, DU community only, and public. *The DU Portfolio is available for students, staff, faculty and alumni, so you can use it after graduation.*

NOTE: You must activate your portfolio site as a student and keep it active in order to use it as alumni.

- **Print Portfolio.** Some things do not lend themselves to electronic presentation including letters, certificates, and projects. You can begin gathering these items in a large notebook but pull from your growing collection of artifacts to provide a selective sampling to take with you on interviews.

Organization. The portfolio must be well organized and designed. For your print portfolio you should create a professional cover page and spine label to slip into the transparent sleeves of the notebook. Your name and contact information should be prominent on the cover. Inside you will begin with a title page and list of contents. Examples of contents might be:

- Resume—always included first after the title page.
- Selected categories—that address the requirement for the position.
- Examples—two or three examples in each category are sufficient.
- Copies—keep your originals safe; you may want to leave the portfolio.
- Options—philosophy of service, statement of goals and objectives,

Using Portfolios. The portfolio can be used in several ways:

- **For a job interview**
  - Present the portfolio at the start of the interview **OR**
  - Present it during the question-answer period.
  - Introduce the portfolio as an example of your skills and experience.
  - Offer to answer questions.

- **Other uses**
  - Performance evaluation.
  - Confidence builder.
  - Conversation starter.
  - Continuing education highlight.

Selected References.

Appendix D—Practicum Final Checklist
(To be completed by the faculty supervisor and student.)

Student Name __________________________________________ Quarter __________

Field Mentor ____________________________________________

Site Name and Address __________________________________

Before the Practicum Experience

1. Attend Showcase of Opportunities (fall quarter)
2. Identify goals and objectives
3. Discuss practicum options with practicum coordinator
4. Investigate possible sites
5. Update resume
6. Meet with potential field mentors (take goals and objectives AND updated resume)
7. Complete the Student Application Form
8. Field mentor approval (as needed; resume required if first-time field mentor.)

During the Practicum Experience

9. Class meeting #1
10. Class Meeting #2
11. Faculty Site/Telephone Visit with Field Mentor: Date __________________________
12. Blackboard Class Discussion Weekly Postings: #1, #2, #3, #4, #5, #6, #7, #8, #9, #10
13. Meeting with coordinator (may be done at the site visit): Date __________________________
14. Student Reflective Learning Journal @ one / week/ 8 hours work
15. Public Presentation

By the end of the Practicum Experience

16. Student Report (Posted to Blackboard (Bb)
17. Student Time Sheet (Signed by field mentor)
18. Student Site Evaluation (Signed by student)
19. Field Mentor Evaluation (Signed by field mentor AND student)
20. Submit everything by the date due indicated by faculty supervisor

Faculty Supervisor ____________________________ Final Grade __________
