

UNIVERSITY of
DENVER

ACADEMIC TECHNOLOGIES CONSULTING

Academic Technologies Consulting consists of former Office of Teaching and Learning staff members Alex Martinez, Rich Path, Carrie Lorenz, and Joseph Labrecque.

This new unit is housed in the OTL office suite and is equipped to explore academic technology projects supporting teaching and learning, research, scholarship, and public good purposes.

SERVICES OFFERED...

Web Application Development

Architect and design a wide array of web-based content for courses and related programs using the latest in standard Web technologies.

Multimedia Content Creation

Design and develop interactive multimedia objects such as case scenarios, interactives, simulations, games, data visualizations, and animated presentations.

Video and Audio Production

Assist in recording and producing video and audio content in support of various university programs.

Graphic and Print Design

Design and produce graphics for both web and print in support of research, scholarship, and other educational endeavors.

Technology Consultation

Support technology choices and integration through individual consultations and hands-on workshops led by professional instructors.
